EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Juan Carlos A. Marquez on February 3, 2006.

Please amend the application as follows:

In the Claims:

Please cancel Claim 1.

-- 8. The bead alignment method for a capillary array according to claim 7, wherein the plurality of beads are aligned one- or two-dimensionally in a predetermined [and] order. --

Allowable Subject Matter

2. Claims 2, 3 and 5-12 are allowed.

As stated in the Office Action dated October 5, 2005, it is known in the art to align a plurality of beads outside a capillary and bond said beads to each other while the bead alignment is retained (Fu et al. and Ito et al.). Additionally, Kambara et al. discloses a method of aligning beads and then transferring said beads into a capillary. The prior art does not, however, disclose a method wherein beads are aligned in a liquid pool outside the capillary. Additionally, the prior

art does not disclose a method wherein the bead alignment structure is disposed into the capillary while retaining the structure produced during alignment as recited in claim 7. No disclosure in the prior art would motivate a person of ordinary skill in the art to align the beads outside a capillary in a liquid pool or dispose the bead alignment structure into a capillary while retaining the bead alignment.
